EXPERIENCE

Dictionary.com — Oakland, CA (remote)

Staff Software Engineer

April 2023 - present

- Key contributor to rebuild and redesign of Dictionary.com and Thesaurus.com, which have over 40 million daily users, going from 5 applications of various tech stacks to a single, isomorphic React application
- Converted Rest API endpoint consumption to Apollo GraphQL for Dictionary and Thesaurus browse pages
- Wrote integration for Storyblok's Headless CMS to populate shared data modules
- Produced in-house design system in tandem with design team using Figma and Style Dictionary
- Established design patterns and best coding practices for frontend team
- Designed software architecture round for interviewing engineering candidates
- Won company Hackathon for co-writing a word puzzle game ("Ghost")

Senior Software Engineer

August 2021 - April 2023

- Collaborated with product, design, backend, and machine learning teams on Grammar Coach writing tool
- Improved UX of Grammar Coach editor by implementing WebSockets, which decreased latency by 75 percent
- Migrated Grammar Coach codebase (over 100 components) to TypeScript and introduced Redux Toolkit

Great Lakes Consulting Services, Inc. — Livonia, MI

Software Developer

January 2019 - July 2021

- Developed and managed a React with Redux (TypeScript) frontend of an end-to-end budget forecasting application with millions of data points for Trinity Health's budget team
- Designed a robust dashboard application with interactive charts and graphs utilizing Dash/Flask (Python)
- Participated in the hiring of junior engineers and interns and facilitated their onboarding and training

Logicdrop — Ferndale, MI

Software Developer

April 2016 - December 2018

- Launched multiple websites and web apps for various clients using cutting-edge frontend frameworks such as Angular 2+, React and Vue
 - Led frontend development for Logicdrop's Studio Platform, a tool for enterprise-level document automation with a drag-and-drop template editor comprised of over 20 custom elements
 - Collaborated with backend team to integrate Rest APIs using RxJS observables
 - Implemented functionality for importing Excel spreadsheets and .CSV files into editable data tables
-

EDUCATION

Grand Circus — Detroit, MI

March 2016

- JavaScript Developer Bootcamp

Oakland University — Rochester, MI

December 2010

- Bachelor of Arts in Journalism (Cum Laude with departmental honors)
-

CERTIFICATIONS

Amazon Web Services

February 2024

- AWS Certified Cloud Practitioner (CLF-Co2)
